## **NAMM 2011: XEOS, A NEW COMPLETE SERIES OF INSTALLATION SPEAKERS BY PROEL**

Presented at NAMM 2011, XEOS is a new series of installation speakers created by Proel to replace the existing Spark and MO/CSE series, with a single range featuring a selected number of models, a renovated look and an improved sound.

The series includes three 2-way surface-mount models: XE35TB/TW with 3.5" woofer, XE55TB/TW, with 5" woofer and XE65TB/W, with 6.5" woofer. The newly designed front baffle featuring a full protection grille with a new stylish and unobtrusive aluminium logo, allows these speakers, available in black or white colour, to blend perfectly into any environment. The horn-loaded dome tweeters and the improved crossover filters provide a smooth and detailed response, suitable both for voice paging and background music applications. All of the three models feature a c-shaped bracket for an easy installation in vertical or horizontal position.

Two square-shape 2-way ceiling models are available, XE55CTX and XE65CTX, featuring 5" and 6.5" coaxial speakers and 70V/100V/8ohm operation. The round-shape ceiling models includes the XE65CT, a two-way coaxial system with 6.5" woofer, and the XE51CT, a full-range 5" model.

The XEOS speakers have been designed for contractors and installers looking for a very economical price combined with a wide choice of models, an elegant design and a high quality sound.

The whole XEOS series has been presented in preview at the last NAMM edition in Los Angeles and will be available for sales in the first quarter 2011.
