

# PERFORM-SERIES: **PT-70**

THE NEW HORN-LOADED  
2-WAY PA SYSTEM  
WITH CARDIOID FUNCTIONALITY

## PT-70

### HORN-LOADED. CARDIOID. PLUG & PLAY.

**FOHNN®** expands its **PERFORM-SERIES** with the **PT-70** – a high performance, 2-way loudspeaker system with cardioid functionality that has been specially developed for concert sound and touring applications.

Ideal as a main PA system for clubs, or events such as town festivals and small to medium sized concerts, the new loudspeaker also acts as a solid extension to line arrays and larger Beam Steering systems.

For the rental market, the **PT-70** has many applications as a multifunctional loudspeaker system.

The **PT-70** contains two 12" chassis with compression chamber and horn, plus a 1.4" compression driver with rotatable CD horn. It also has a passive crossover with self-resetting **Intelligent Protection Circuit (IPC)**, a voltage-controlled semiconductor circuit to protect the high frequency driver from overload.

Due to its extremely good cardioid functionality, this low-mid system produces far fewer unwanted reflections near the stage, ensuring first-class sound reproduction and speech intelligibility. Together with **FOHNN®** subwoofers and amplifiers, the **PT-70** delivers amazing results.

### THE **PT-70** AT A GLANCE:

- horn-loaded, passive loudspeaker, 2-way, bass reflex
- Components: 2 x 12" with horn and compression chamber / 1 x 1.4"
- 2-way split with passive crossover including IPC high frequency protection
- outstanding cardioid functionality
- very high performance and power capability (3600 W peak power)
- low weight (ca. 38 kg)
- compact dimensions (400 x 800 x 450 mm)
- metal braced birch plywood housing
- front grille in housing colour – with acoustic foam behind
- supplied as standard with black, weatherproofed polyurethane coating that includes UV protection and waterproofed membrane
- available in all RAL colours
- well designed mounting system for flown applications (2 x Quicklock locks for flying brackets, 2 x AEROQUIP flying tracks, 2 x eyelets for safety, integrated pole mounting flange)
- equipped with 2 x Neutrik NL4 Speakon connectors
- optimized for use with **FOHNN®** subwoofers and amplifiers
