

NEW Plixus AE-R

**A slim and standalone core
for your conference**

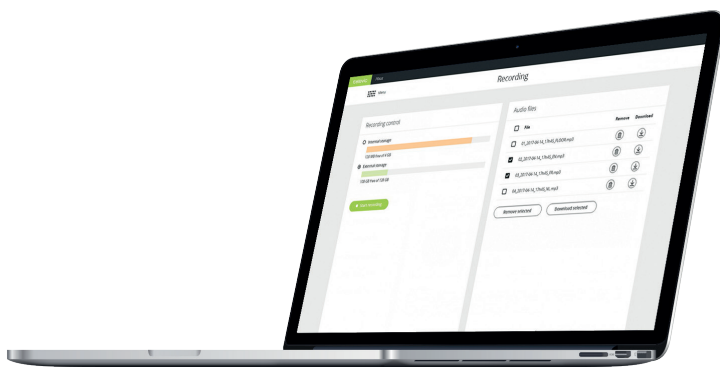

televic
conference

A compact cornerstone

The Plixus AE-R is a compact central engine with **all functionality on board to run a conference, without the need for a dedicated computer**. From microphone management over interpretation channels and audio routing to camera control: the Plixus AE-R is ready for action. With an integrated memory, an expandable USB slot, and a recording button at the front, recording meetings becomes a breeze. Even multilingual ones.

From simple to advanced meetings

Whether your meeting only requires basic functionality or whether you need complex features, Plixus AE-R is a versatile partner. An easy to use **web server gives you full access to core meeting functionality**. If you need advanced tools, **Plixus AE-R works with the full suite of CoCon applications** to make even the most demanding meetings a success. What's more, Plixus AE-R also **plays seamlessly with software solutions** such as **Congressify and T-Council**.

Wired & Wireless

Since the Plixus AE-R is powered by the Plixus® network, you enjoy all the benefits of the most versatile conference network technology around. **Especially when it comes to wired and wireless combinations**. Wireless projects driven by the Plixus AE-R can extend the range to support larger meeting spaces. Combine or split rooms with a wireless station through a simple click: it's that easy.

One engine, many options:

- *standalone core*
- *wired-wireless combination*
- *wireless range extension*
- *wireless split & combine rooms*
- *wireless redundancy*
