

uniCOS PRO T

uniCOS 10" Tabletop Multimedia Unit

Description

uniCOS PRO T is Televic's tabletop multimedia conferencing unit, specifically designed for the Plixus architecture. Power is delivered over the Plixus conference network, so no additional power distribution towards the room is required. No need for different devices, you can configure the uniCOS PRO T as either a delegate or a chairman unit.

Every participant has access to all audible and visual information on his or her proper uniCOS unit.

Participants can speak, see, hear, and interact with delegate stations by combining video, audio, and document sharing.

The uniCOS PRO T features a bright 10" adjustable touchscreen that you can angle into different positions, from fully horizontal to an angle of 90°. The screen gives participants intuitive access to every uniCOS feature. From video selection, over messaging and talking to other participants, agendas, delegate information, texting, to voting, and the option to hide features that are not relevant to the meeting. With the integrated camera, you can easily configure talking heads.
