

A product from the extremely successful Xperience range!
The large **Xperience IV** with innovative concept was awarded the title **Product of the Year 2005/2006**.

Fohhn® Xperience I.

available June 2007

The ultra-compact active PA system for small events.
Excellent sound quality. State-of-the-art DSP amplifier technology for a wide range of options.

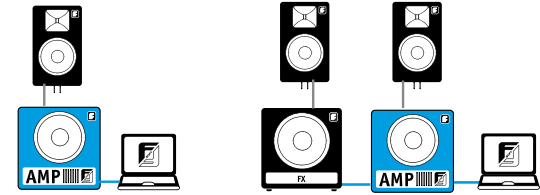

Fohhn Xperience I is out to impress!

Low weight, compact dimensions
and a deep, powerful sound.

The most compact active PA system manufactured by Fohhn.

Xperience I is the smallest DSP-controlled speaker system in the Xperience series. The capacity, compact dimensions and low weight of this speaker are more than impressive. The active subwoofer XS-10 is equipped with two 6" Neodym speakers and state-of-the-art digital amplifier technology, but weighs only 12 kg. The new 8"/1" CD Top XT-10 weighs only 9 kg due to the Neodym speaker technology used.

Wide range of combination options.

From 2 to 4 Top speakers and an additional passive Sub (XSP-10) can be connected to the active subwoofer XS-10

The ultra-compact active subwoofer XS-10 (front and rear view)

The 8"/1" CD Top XT-10

Small stage, big performance.

Xperience I is the perfect system for users who tend to stage smaller events or play mainly at home but still require excellent sound quality.

Same technology as Xperience II to IV.

Like all Fohhn systems, Xperience I is equipped with very powerful digital signal processors (DSP). The DSPs are available in two versions and consist of a speaker management system and digital audio devices such as the 10-band parametric EQ, dynamic processor and delay, which adapt the system to the room acoustics and individual sound preferences. The parametric EQ offers enormous benefits when used at home because certain frequency ranges

can be filtered out to avoid disturbing neighbours or cohabitants. All sound settings are easy to store and retrieve at any time and the Xperience I system can be operated remotely via a laptop or handheld device.

Extensive range of options.

In the same way as the larger Xperience systems, here users also have the option of selecting almost any Top from the Fohhn range. Tops from the ARC-Series AT-05, AT-06, AT-07 or Linea AL-20 and AL-50 are most suitable for home applications and are available in all RAL colours or with stylish piano finish. A perfectly tuned preset for each Top is stored in the integral speaker database.

XT-10 – ideal as a monitor.

XT-10 directed accurately at the audience.

Remote operation via a laptop.
